January 1971 to June 1971

195

## CONTENTS OF VOL. XIII (Nos. 1-6)

### (FIRST SERIES)

#### NUMBER 1—JANUARY

|  | Page |
|--|------|
| Passivity and stability of systems with a state representation. By R. F. ESTRADA, Bell Telephone Laboratories Inc., Whippany, New Jersey, and C. A. DESOER, Department of Electrical Engineering and Computer Science, University of California, Berkeley, California.....   | 1    |
| Determination of parameters of alternator voltage regulator for steady-state stability using Siljak's extension to Mitrovic's method. By R. C. DESAI, Faculty of Technology and Engineering, M.S. University, Baroda, India, and R. A. YADAV, B.V.M., Sardar Patel University, Vallabh Vidyanagar, India .....   | 27   |
| An improved analogue technique for solving trajectory optimization problems. By P. L. NEELY, Department of Electrical Engineering, The Queen's University of Belfast, and A. P. ROBERTS, Department of Engineering Mathematics, The Queen's University of Belfast.....   | 33   |
| State estimation from measurements with correlated noise without using differentiators. By PHILIP E. SARACHIK, Department of Electrical Engineering, New York University, Bronx, New York 10453.....   | 53   |
| Single silicon-controlled rectifier reversible drive motor control. By P. C. SEN and D. K. GHOSH, Department of Electronics and Telecommunication Engineering, Jadavpur University, Calcutta-32, India.....  | 65   |
| On the sector of stability in Aizerman's method. By P. JACUSIEL, Department of Electrical Engineering, Columbia University, New York, and R. E. KING, Division of Science and Engineering, Richmond College of the City University of New York, N.Y.....   | 77   |
| A new method of evaluating quadratic and time-weighted quadratic form performance indices. By K. RAMAR and B. RAMASWAMI, Department of Electrical Engineering, Indian Institute of Technology, Madras-36, India....  | 83   |
| A geometrical analysis of the Lyapunov operator. By CARLOS J. TAVORA, Electrical Engineering Department, University of California, Berkeley, California 94720 .....  | 97   |
| System identification via an extension of the impulse method of Guillemin. By A. B. BABAJIDE and T. Z. FAHIDY, Department of Chemical Engineering, University of Waterloo, Canada.....   | 107  |
| The analysis of discrete time systems with deterministic inputs by the serial/matrix method. By P. WELLS and E. HUNTLEY, Department of Applied Mathematics and Computing Science, University of Sheffield.....   | 113  |
| On the optimality of the boundary control for the non-linear control system with controls appearing linearly. By MASASUKE SHIMA, Department of Control Engineering, Faculty of Engineering Science, Osaka University, Osaka, Japan, and YOSHIKAZU SAWARAGI, Department of Applied Mathematics and Physics, Faculty of Engineering, Kyoto University, Kyoto, Japan..... | 131  |
| On the identification of hybrid distributed-parameter control systems. By S. G. TZAFESTAS, Electronic Computers Division, Nuclear Research Centre 'Democritus', Athens, Greece.....  | 145  |
| A Popov-criterion-based algorithm for control system synthesis using non-linear compensators. By DEVENDRA P. GARG, Department of Mechanical Engineering, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139 .....   | 155  |

|   | Page |
|---|------|
| Stability and subharmonics in a sinusoidal perturbation hill-climbing system. By D. J. G. JAMES, Department of Mathematics, Lanchester Polytechnic, Rugby, England.....   | 165  |
| Optimal feedback gains for the linear system—quadratic cost problem. By D. H. MEE, Centre for Computing and Automation, Imperial College of Science and Technology, London .....  | 179  |
| Pseudo-convexity and quasi-concavity in optimal discrete-time control systems. By B. J. KIRBY, Department of Mathematics, Queen's University, Kingston, Ontario, Canada, and W. COOK, Department of Mathematics, Dalhousie University, Halifax, N.S., Canada .....                      | 189  |
| Research note:  |      |
| A note on the potential function algorithm for pattern classification. By C. CHITTI BABU and WAH-CHUN CHAN, Department of Electrical Engineering, University of Calgary, Calgary, Alberta, Canada....   | 199  |
| Correspondence:   |      |
| Comment on "The optimal control of linear systems with delay" and "Optimal control for systems which include pure delays". By GUY JUMARIE, Department de mathématiques, Montreal, Canada.....   | 201  |
| Comment on "Graphical analysis of a class of non-linear feedback control systems with step input". By M. S. KRISHNAMOORTHY, Graduate Student, Department of Electrical Engineering, I.I.T., Kanpur .....  | 205  |
| Symposium:  |      |
| Measurement and Control in Road Transportation: Call for papers....   | 207  |
| <hr/> NUMBER 2—FEBRUARY <hr/>   |      |
| A review of process identification and parameter estimation techniques. By R. E. NIEMAN, D. G. FISHER and D. E. SEBORG, Department of Chemical and Petroleum Engineering, University of Alberta, Edmonton, Alberta, Canada .....  | 209  |
| Stability of feedback systems with pulse-frequency modulation. By M. S. VARADARAJAN, Department of Electrical Engineering, Indian Institute of Science, Bangalore, India .....  | 265  |
| A class of $q$ -nary recurrent codes for burst-error correction. By H. T. HSU, Department of Computer Science, Pennsylvania State University, University Park, Pa. 16801 .....  | 273  |
| A class of majority decodable multiple solid burst-error correcting cyclic codes. By H. T. HSU, Department of Computer Science, Pennsylvania State University, University Park, Pa. 16802.....  | 289  |
| An explicit form for the closed-loop system matrix of a partially uncontrollable linear system. By B. PORTER and T. R. CROSSLEY, Department of Mechanical Engineering, University of Salford, Salford M5 4WT.....   | 295  |
| On smoothing in linear discrete systems with time delays. By ROLAND PRIEMER, Department of Information Engineering, University of Illinois, Chicago Circle Campus, and ANDRÉ G. VACROUX, Department of Electrical Engineering, Illinois Institute of Technology, Chicago, Illinois..... | 299  |
| Control of a class of non-linear diffusions. By J. SHAPIRO and G. MON, Department of Engineering and Applied Science, Yale University, New Haven, Connecticut .....   | 305  |
| A progressive computation technique for updating optimal control functions. By P. L. NEELY, Department of Electrical Engineering, The Queen's University of Belfast, and A. P. ROBERTS, Department of Engineering Mathematics, The Queen's University of Belfast.....                   | 325  |

|   | Page |
|---|------|
| Separability, neutrality and certainty equivalence. By J. W. PATCHELL and O. L. R. JACOBS, Department of Engineering Science, University of Oxford, Parks Road, Oxford.....   | 337  |
| On the behaviour of optimal linear sampled-data regulators. By ALEXANDER H. LEVIS and ROBERT A. SCHLUETER, Department of Electrical Engineering, Polytechnic Institute of Brooklyn, N.Y., 11201, and MICHAEL ATHANS, Department of Electrical Engineering, Massachusetts Institute of Technology, Cambridge, Mass. 02139..... | 343  |
| Feedforward-feedback control of distributed parameter systems. By D. R. HAHN, L. T. FAN and C. L. HWANG, Institute for Systems Design and Optimization, Kansas State University, Manhattan, Kansas 66502.....   | 363  |
| Linear optimal stochastic control using instantaneous output feedback. By P. J. McLANE, Department of Electrical Engineering, Queen's University, Kingston, Ontario.....  | 383  |
| Correspondence:   |      |
| On the paper "Topology of velocity-space for stability analysis". By CARL KALLINA, Mobil Oil Corporation, Princeton Computer and Mathematics Services Center, P.O. Box 1025, Princeton, New Jersey 08540.....   | 397  |

### NUMBER 3—MARCH

|  |     |
|--|-----|
| Sub-optimal nonlinear controllers for relay and saturating control systems. By A. T. FULLER, Engineering Department, Cambridge University.....   | 401 |
| A heuristic approach to optimal control. By M. G. NOTLEY, IBM Scientific Centre, Peterlee, Co. Durham.....   | 429 |
| New methods of rational function decomposition with applications in active network synthesis. By V. V. V. RAGHAVA RAO and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore-12, India.....         | 449 |
| Active RC realization of positive real axis transmission zeros using a differential-output amplifier. By S. N. RAO and V. V. V. RAGHAVA RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore-12, India..... | 459 |
| A note on burst-error correcting recurrent codes. By H. T. HSU, Department of Computer Science, The Pennsylvania State University, University Park, Pennsylvania 16802, U.S.A.....   | 465 |
| Some properties of cyclic codes. By H. T. HSU, Department of Computer Science, The Pennsylvania State University, University Park, Pennsylvania 16801.....   | 473 |
| A new method of turbine governing for improved transient stability. By G. SHEARD and F. J. EVANS, School of Electrical Engineering, The University of Sydney, N.S.W. 2006, Australia.....  | 479 |
| A systematic procedure for writing and solving equations of sampled-data systems. By G. COOK, Department of Electrical Engineering, School of Engineering and Applied Science, University of Virginia, Charlottesville, Virginia.....    | 491 |
| A unified canonical form for controllable and uncontrollable linear dynamical systems. By C. D. JOHNSON, University of Alabama in Huntsville, Huntsville, Alabama.....   | 497 |
| A canonical form for a multi-variable, multi-output linear control system. By T. R. CROSSLEY, Department of Mechanical Engineering, University of Salford, Salford M5 4WT.....   | 519 |

|  | Page |
|--|------|
| Minimal realization of transfer function matrices. By P. E. CAINES, Centre for Computing and Automation, Imperial College, University of London. . . .   | 529  |
| Sampled-data theory applied to the modelling and control analysis of compression ignition engines—Part I. By P. A. HAZELL and J. O. FLOWER, Inter-university Institute of Engineering Control, The School of Applied Sciences, University of Sussex, Falmer, Brighton. . . . . | 549  |
| Analysis of stochastic systems with applications to sensitivity. By R. L. KLEIN and E. D. EYMAN, Department of Electrical Engineering, University of Iowa, Iowa City, Iowa 52240. . . . .  | 563  |
| An optimal algorithm for pattern classification. By C. CHITTI BABU and WAH-CHUN CHAN, Department of Electrical Engineering, The University of Calgary, Calgary, Alberta, Canada. . . . .   | 577  |
| The zeros of complex polynomials, matrix inequalities and non-linear programming. By J. N. HANSON, The Cleveland State University, Cleveland, Ohio 44115. . . . .  | 587  |
| Non-linear systems in Hilbert resolution spaces. By WILLIAM A. PORTER, Department of Electrical Engineering, University of Michigan, Michigan, U.S.A. . . . .  | 593  |
| Research notes:  |      |
| On obtaining state equations from a set of differential and algebraic equations. By Y. MURAD and R. SIVAN, Faculty of Electrical Engineering, Technion, Israel Institute of Technology, Haifa, Israel  | 603  |
| On the definition of 'transfer function'. By S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore-12, India. . . . .  | 607  |

#### NUMBER 4—APRIL

|  |     |
|--|-----|
| Sampled-data theory applied to the modelling and control analysis of compression-ignition engines—Part II. By J. O. FLOWER and P. A. HAZELL, Inter-University Institute of Engineering Control, The School of Applied Sciences, University of Sussex. . . . .                                  | 609 |
| Discrete modelling of spark-ignition engines for control purposes. By P. A. HAZELL and J. O. FLOWER, Inter-University Institute of Engineering Control, The School of Applied Sciences, University of Sussex, Falmer, Brighton. . . . .  | 625 |
| Stability analysis of linear continuous time-delay feedback systems. By E. A. KING-SMITH, Aerospace Engineering Department, University of Michigan, Ann Arbor, Michigan, U.S.A. . . . .  | 633 |
| Limit cycles in relay-type third-order sampled-data control systems. By M. V. C. RAO and P. VENKATA RAO, Department of Electrical Engineering, Indian Institute of Technology, Madras 36, India. . . . .   | 657 |
| Response of non-linear systems to inputs with any number of frequency components. By R. G. SEA, Ground Systems Group, Hughes Aircraft Company, Fullerton, California 92634, and A. G. VACROUX, Department of Electrical Engineering, Illinois Institute of Technology, Chicago, Illinois 60616 | 679 |
| A chain of factored matrices for Routh array inversion and continued fraction inversion. By L. S. SHIEH, W. P. SCHNEIDER and D. R. WILLIAMS, Department of Electrical Engineering, University of Houston, Houston, Texas 77004. . . . .  | 691 |
| A counterpart of Popov's theorem for the existence of periodic solutions. By E. NOLDUS, Laboratory De Winne for Control Theory, University of Ghent, Belgium. . . . .  | 705 |

|   | Page |
|---|------|
| Compensator design for decoupling of multivariable systems by state feedback. By S. P. PANDA, Department of Electrical Sciences, State University of New York, Stony Brook, New York.....   | 721  |
| Sub-optimal control for multivariable systems based on an orthogonal decomposition technique. By E. A. FREEMAN and A. TODD, Department of Control Engineering of Sunderland Polytechnic, England.....   | 737  |
| Overshoot contours for second-order transfer function with a pair of complex poles and a negative real zero. By R. HARIHARAN, Department of Mechanical Engineering, Indian Institute of Science, Bangalore-12, India....                            | 763  |
| On the transient solution of the unforced duffing equation with large damping. By A. C. SOUDACK and P. G. D. BARKHAM, Electrical Engineering Department, University of British Columbia, Vancouver, Canada.....                                     | 767  |
| Optimal design of sampled-data control systems by linear programming. By P. RAGHAVAN, Department of Electrical Science, State University of New York at Stony Brook, Stony Brook, New York.....   | 771  |
| An electrical contour integrator. By GANTI PRASADA RAO, R. SUBBAYYAN, P. R. RANGASWAMY, R. SHANMUGAM, R. SRIDHARAN and K. P. SRINIVASAN, Department of Electrical Engineering, PSG College of Technology, Peelamedu, Coimbatore-4, South India..... | 785  |
| The effect of parameter variation on the periodic oscillations in a non-linear system. By S. N. BASUTHAKUR and S. T. JOG, Division of Control Engineering, University of Saskatchewan, Saskatoon, Saskatchewan, Canada.....                         | 793  |

---

#### NUMBER 5—MAY

|  |     |
|--|-----|
| Mathematical programming and the control of Markov chains. By H. J. KUSHNER and A. J. KLEINMAN, Department of Applied Mathematics, Brown University, Providence, Rhode Island.....   | 801 |
| Synthesis of modal control systems having confluent eigenvalues. By T. R. CROSSLEY, Department of Mechanical Engineering, University of Salford  | 821 |
| Mathematical solution of the problem of optimal control of integrated power systems with generalized maximum principle. By T. S. DILLON and K. MORSZTYN, Department of Electrical Engineering, Monash University, Clayton, Australia.....  | 833 |
| Diffusions and stochastic games. By GORDON R. MON, Department of Engineering and Applied Science, Yale University.....   | 853 |
| A generalization of the potential function method to multiclass pattern classification. By C. CHITTI BABU and WAH-CHUN CHAN, Department of Electrical Engineering, University of Calgary, Calgary, Alberta, Canada....   | 865 |
| Stabilization of non-linear sampled-data control systems with inherent hidden oscillations. By M. V. C. RAO and P. VENKATA RAO, Department of Electrical Engineering, Indian Institute of Technology, Madras-36, India....   | 873 |
| Extended stability conditions for a feedback system with backlash. By H. MAEDA and M. IKEDA, Department of Communication Engineering, Osaka University, Suita, Osaka, Japan, and S. KODAMA, Department of Electrical Engineering and Computer Science, University of California, Berkeley..... | 881 |
| Quelques méthodes et résultats sur les systèmes non-linéaires multivariables échantillonnées. Par GUY JUMARIE, Département de Mathématiques, l'Université du Québec, Montréal, Canada.....   | 897 |
| A direct proof of equivalence of invertibility criteria of multi-variable linear systems. By S. P. PANDA, Department of Electrical Sciences, State University of New York, Stony Brook, New York 11790.....  | 931 |

|  | Page |
|--|------|
| On passivity of a class of systems with time-varying non-linearities. By MIN-YEN WU, Department of Electrical Engineering, University of Colorado, Boulder, Colorado 80302, U.S.A.....   | 937  |
| Control system synthesis and analysis by approximation to third-order systems. By IT BAU HUANG and KEH SHEW LU, Department of Electrical Engineering, Cheng Kung University, Tainan, Taiwan, China.....                          | 949  |
| Topological analysis of ladder structures. By J. K. FIDLER, Department of Electrical Engineering Science, University of Essex, Colchester, Essex, England.....   | 961  |
| Analysis and control of distributed systems using non-eigen space modes. By C. K. SANATHANAN and J. D. FERGUSON, Department of Information Engineering, University of Illinois, Chicago.....                                     | 967  |
| Designed of control systems with random parameters. By A. H. HADDAD, J. B. CRUZ, Jr. and P. V. KOKOTOVIĆ, Department of Electrical Engineering and Coordinated Science Laboratory, University of Illinois, Urbana, Illinois..... | 981  |
| A minimax problem for distributed parameter systems. By PAN-TAI LIU, Mathematics Department, University of Rhode Island, Kingston, Rhode Island.....   | 993  |
| Non-linear semi-group theory and stability for infinite dimensional systems. By DAHSOONG YU, University of Oklahoma, Norman, Oklahoma 73069.....   | 1001 |

---

NUMBER 6—JUNE

|   |      |
|---|------|
| Analysis of ferro-resonant jump phenomenon in mutually coupled non-linear L.C.R. circuits. By B. V. JAYAWANT and M. F. E. R. TAHA, Institute of Engineering Control, Applied Science Laboratory, University of Sussex, Brighton.....  | 1009 |
| Simple methods for identifying linear systems from frequency or time response data. By L. S. SHIEH, Electrical Engineering Department, University of Houston, Houston, Texas 77004, C. F. CHEN, Engineering Department, University of Cambridge, England, and C. J. HUANG, Chemical Engineering Department, University of Houston, Houston, Texas 77004.....          | 1027 |
| A direct approach to the design of asymptotically optimal controllers. By A. JAMESON and D. ROTHSCHILD, Grumman Aerospace Corporation, Bethpage, New York 11714.....  | 1041 |
| The modelling of an engine injector mechanism as a dynamic gain element and its application. By J. O. FLOWER and P. A. HAZELL, Inter-University Institute of Engineering Control, The School of Applied Sciences, University of Sussex, Falmer, Brighton.....   | 1051 |
| Analysis of a control system containing two non-linearities. By SHERMAN M. SELTZER, George C. Marshall Space Flight Center, Huntsville, Alabama 35812.....  | 1057 |
| Output distributions and covariance functions of certain non-linear transformations. By M. C. CHENG, Department of Mathematics, University of Malaya.....   | 1065 |
| Inverse stability problem and its applications. By KAZUMASA HIRAI, Department of Instrumentation Engineering, Kobe University, Kobe, Japan.....   | 1073 |
| On the estimation of stochastic sensitivity for non-linear dynamical systems in state estimation problems. By YOSHIFUMI SUNAHARA, Department of Mechanical Engineering, Kyoto Institute of Technology, Matsugasaki, Kyoto, Japan, and YOSHIKAZU SAWARAGI and KOHJI OHMINATO, Department of Applied Mathematics and Physics, Kyoto University, Yoshida, Kyoto, Japan.. | 1083 |

|  | Page |
|--|------|
| Sequential estimation of states for non-linear lumped parameter systems. By S. R. ATRE and S. S. LAMBA, Department of Electrical Engineering, Indian Institute of Technology, Hauz Khas, New Delhi-29, India.....  | 1097 |
| The minimal time control of multi-system problems with energy constrained inputs. By JURI SILMBERG and KOICHI MIZUKAMI, Department of Electrical Engineering, University of Toronto, Toronto, Canada.....  | 1105 |
| A variable parameter Liapunov function for a class of non-linear systems. By SARBESHWAR PRUSTY, Department of Electrical Engineering, Imperial College of Science and Technology, London, S.W.7.....   | 1117 |
| On Popov criteria for $\Sigma$ PFM systems. By E. P. F. KAN and E. I. JURY, Department of Electrical Engineering and Computer Sciences, Electronics Research Laboratory, University of California, Berkeley, California 94720....  | 1121 |
| Identification of multiple-input multiple-output linear systems by correlation methods. By D. SCHWALM, C. C. R. Euratom, 21020 Ispra (Varese), Italy.....  | 1131 |
| Sensitivity functions for multi-input linear time-invariant systems. By CHARLES P. NEUMAN and ARUN K. SOOD, Department of Electrical Engineering, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213.....  | 1137 |
| Extension of the Krylov-Bogoliubov equivalent linearization principle to coupled non-linear systems. By D. L. LANSDOWNE, Department of Electrical Engineering, University of British Columbia, Vancouver, Canada, and A. C. SOUDACK, Department of Electrical Engineering, Technion, Israel..... | 1151 |
| Stability of combined integral pulse-frequency and pulse-width-modulated systems. By K. B. DATTA, Department of Applied Physics, University of Calcutta, 92 Acharyya P.C. Road, Calcutta-9, India.....   | 1161 |
| Stochastic optimal control for linear but non-gaussian systems. By D. L. ALSPACH and H. W. SORENSON, Department of Aerospace and Mechanical Engineering Sciences, University of California at San Diego, La Jolla, California 92037.....   | 1169 |
| Sub-optimal control of non-linear dynamical systems via linear approximation. By G. K. L. KRIECHBAUM, The Boeing Company, Seattle, Washington, and E. NOGES, Department of Electrical Engineering, University of Washington, Seattle, Washington.....  | 1183 |
| Research note:   |      |
| A new algorithm for the location of the saddle points on the root loci. By A. K. BANDYOPADHYAY and M. N. ROY, Electronics and Telecommunication Engineering Department, Jadavpur University, Calcutta-32, India.....   | 1197 |
| Notices:   |      |
| Control Systems Design, 26-30 July 1971. Analog Simulation and Computation, 2-6 August 1971.....   | 1200 |
| Subject index.....   | 1201 |
| Author index.....  | 1203 |
